	Raw Score	Transformed (0-100)	Community Percentile
Physical Health	30	81	66
Psychological Health	19	56	15
Social Relationships	11	69	45
Environment	29	69	32

WHOQOL-BREF Percentiles

Scoring and Interpretation Information

For comprehensive information on the WHOQOL-BREF, [see here](#).

The total score is presented between 26 and 156, where higher scores represent higher levels of quality of life. A quality of life profile is also produced by examining the four domain scores.

Client Name | Generic Client

1. Physical health (items 3, 4, 10, 15, 16, 17, 18). Raw scores between 7 and 35: Assesses energy levels, pain, sleep quality, mobility, ability to perform daily activities, dependence on medical treatments, and capacity for work.
2. Psychological Health (items 5, 6, 7, 11, 19, 26). Raw score between 6 and 30: Evaluates positive feelings, thinking and concentration abilities, self-esteem, body image, negative emotions, and sense of meaning in life.
3. Social relationships (items 20, 21, 22). Raw score between 3 and 15: Measures satisfaction with personal relationships, social support from friends and family, and sexual life.
4. Environment (items 8, 9, 12, 13, 14, 23, 24, 25). Raw score between 8 and 40: Examines physical safety, home conditions, financial resources, access to health services and information, leisure opportunities, physical environment quality, and transport availability.

As well as raw scores being presented, a transformed score between 0 and 100 is computed - this represents the percentage of the total possible score for each domain. This allows domain scores to be compared to each other. Higher transformed scores are indicative of a higher level of quality of life. Scores are also presented as a percentile rank against the normative Australian population. Higher percentiles represent higher quality of life, and a percentile of 50 represents average quality of life.

On first administration a plot is displayed showing the domain percentiles with shaded colours in the background. On multiple administrations, the transformed score is shown over time so that changes as a result of treatment can be seen.

Client Responses

		Very poor	Poor	Neither poor nor good	Good	Very good
1	How would you rate your quality of life?	1	2	3	4	5
		Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
